DETAILED ACTION

Response to Amendments

1. Claims 42 and 43 have been amended. Claims 33-36 and 38-48 are now pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 42-48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 42 and 43 have been amended to recite that the "a plasma polymerized functionality forming a film having a thickness of about 10 to about 150 nm and being plasma polymerized acrylic acid and wherein the degree of cross linking in the plasma polymerized film is less than about 5%". The Applicants direct the Examiner's attention to page 5, lines 6-7 of the Specification for support for such an amendment. However, the Examiner disagrees with the Applicants interpretation of what pages 4 and 5 of the Specification recite. The end of page 4 and the beginning of page 5 specifically recites "The plasma polymerized film is typically cross linked to varying degrees depending on

Application/Control Number: 09/827,887

Art Unit: 1773

the nature of the compounds in the plasma which form the film and the radiofrequency (RF) intensity used in the plasma polymerization process. In a presently preferred embodiment, the degree of cross linking is minimized in order to maximize the chemical modification, i.e., the amount of the plasma polymerized functionality on the surface of the component. In one embodiment, the degree o cross film is less than about 5%". Since the amount of cross linking is dependent on the nature of the compounds in the plasma, one does not then have support for plasma polymerized acrylic acid having a degree of cross linking in an amount of less than about 5%.

All new matter must be cancelled in response to this Office Action. Applicants are reminded that any prior art rejections may be re-instated upon cancellation of the new matter.

Response to Arguments

3. Applicant's arguments with respect to claims 42 to 48 have been considered but are most in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 33-36 and 38-41 are allowed.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1773

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheeba Ahmed whose telephone number is (571)272-1504. The examiner can normally be reached on Mondays and Thursdays from 9:30am to 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on (571)272-1284. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
